2. Status Report on the GGN Association 2022 - 2023

Nickolas Zouros (GGN President) presented the Status Report of the GGN for the activities made during the last 2 years. The report includes the activities that were implemented after the elections of the new GGN Executive Board in December 2021 until September 2023. The new GGN Executive Board members after their election worked for the effective operation of the Association as well as for the support of the UNESCO Global Geoparks, the broader visibility of the Geoparks and awareness raising on their mission.

He emphasized that a lot of work has been done on the communication and promotion of the Geoparks, using social media, GGN websites and by participating in the celebrations of international

days. He presented statistical data showing the success of the GGN social media campaigns and the social media promotion of the GGN, its activities and the Geoparks' activities and events.

He reminded about the initiatives the GGN is implemented such as the Film Festival, the Best Practice Awards, the Youth Forum, the GGN digital meetings and events. He referred to the initiatives on the Africa and the Arab States Grant and the Grant for the Small Island Developing States (SIDS) developed in collaboration with UNESCO.

He presented the logo the celebration of the GGN 20th Anniversary and the activities that will be organized and asked all members to participate in this celebration.

He underlined the support of UNESCO and of the GGN Advisory Committee in the effort of enlarging the membership, supporting the regional networks, establishing new initiatives and build a framework for the years to come.

Thanked all the members of the GGN General Assembly for their efforts and work during the last two years.

He opened the floor for comments and questions on the report of the Executive Board 2022 - 2023.

Patrick McKeever (GGN Honorary member/ Ireland) informed that there are evaluators that applied to become members of the Roster of evaluators and until now they haven't received any reply to their messages.

He asked who decide who evaluator goes at which Geopark and with which criteria is decided who evaluator will participate at which evaluation and/or revalidation mission(s).

He mentioned that the network doesn't have the experts for conducting consultant missions in Sub-Saharan Africa and cannot experts go there and just prepare a video. He suggested in the future the network should send as consultants only experts of the Sub-Saharan Africa. He also suggested that the network should develop partners in order to bring more Geoparks from Africa.

Jutta Weber (Bergstraße-Odenwald UNESCO Global Geopark/Germany) commented for all members on the stage that all are doing endless work for the preparation of all documents of the General Assembly and they doing voluntary work for all members.

Elizabeth Silva (GGN Individual member/Portugal) commented that the network needs more visibility inside the UNESCO programmes and UN and she suggested the GGN to use its 20th Anniversary in order to be more present in UNESCO, to invite also UN representatives to participate in its 20th Anniversary future events, to inform Secretary and the permanent delegation of UNESCO in America, to present in UNESCO Secretariat and UN in America the concrete results that have been

achieved by the network to improve the SDGs. She also mentioned that it is needed to fulfill gender equality.

Martina Paskova (Bohemian Paradise UNESCO Global Geopark/Czechia) mentioned that the GGN report is wide it can be used for reflection and to present the activities of the network in society but is missing the presentation of the involvement of the indigenous people. He noticed that in the 4th GGN General Assembly are participating very few indigenous people but maybe in the future more indigenous people will participate.

Nickolas Zouros (GGN President) replied to the previous questions by the GGN members and he mentioned that the presentation of the GGN report cannot have many details but the printed report has more details as the GGN tries to communicate all its activities. He mentioned that the

GGN Working Group on the Indigenous People is doing tremendous job, indigenous people, the promotion of the indigenous knowledge is priority and the network support it in every case. He thanked Guy Martini for the promising document that prepared about the Indigenous People in the UNESCO Global Geoparks.

He thanked Elizabeth Silva for his comments on SDGs and Driss Achbal for the participation of the ASD in the conference. He also congratulated Driss Achbal for the great political support to the idea of the Geoparks.

He informed that the Secretariat of UNESCO is responsible for the nomination of new evaluators and there is a specific procedure for the nomination of the evaluators. Due to pandemic there is a delay in inclusion of all new evaluators. The Roster of evaluators is a joint responsibility of the GGN and UNESCO, the GGN holds the Roster of evaluators and provides all the information for the evaluators. There are various criteria for the selection of an evaluator for a mission, for example an evaluator cannot visit for second time the same Geopark.

He mentioned that the new Geoparks and territories can benefit from the joint initiatives of UNESCO and the GGN like the Grants for Africa and the Small Island Developing States (SIDS) in order to get knowledge but also can get knowledge by mature Geoparks on how they are operating. The network is using all its tools in order to help Geoparks like for example its capacity building activities and UNESCO seminars.

DECISION: The GGN Institutional and Individual members who were present unanimously agreed to the presented Status Report on the GGN Association 2022 - 2023.

GLOBAL GEOPARKS NETWORK STATUTES SEPTEMBER 2023

INTRODUCTION

The Statutes of the Global Geoparks Network (hereinafter referred to as "GGN") is the basic document of the Organization.

The internal Rules and Regulations of the GGN, the Code of Ethics and the Anti-harassment policy define and complete these Statutes. The practices of the GGN must be based on honesty, fairness and mutual respect, as well as service to the international Global Geopark community.

Global Geoparks are tools to conserve and enhance the value of areas of geological significance in Earth history, including landscapes and geological formations, which are key witnesses to the evolution of our planet and determinants for our future and to promote sustainable development for example through geotourism.

Global Geoparks promote the links between geological heritage and all other aspects of the area's natural and cultural heritage, clearly demonstrating that geodiversity is the foundation of all ecosystems and the basis of human interaction with the landscape.

The GGN was founded in 2004 as an international partnership developed under the umbrella of UNESCO and serves to develop models of best practice and set quality-standards for territories that integrate the protection, preservation of Earth heritage sites in a strategy for regional sustainable economic development.

Networking and collaboration among Global Geoparks is an important component of the GGN.

UNESCO encourages this cooperation especially in the fields of education, management, tourism, sustainable development; regional planning among Network members and especially encourages an equitable geographical development of Global Geoparks.

The GGN promotes networking on a regional basis. For Global Geoparks in Asia – Pacific the Asia-Pacific Geoparks Network (APGN) acts as the Regional Network of the GGN. For Global Geoparks in Europe, the European Geoparks Network (EGN) acts as the Regional Network of the GGN. For Global Geoparks in Latin America - Caribbean, the Latin America and Caribbean Geoparks Network (GeoLAC) acts as the Regional Network of the GGN. For Global Geoparks in Africa, the African UNESCO Global Geoparks Network (AUGGN) acts as the Regional Network of the GGN. The GGN prioritizes the creation of similar Regional Networks, reflecting local conditions, elsewhere in the world.

The objectives of the GGN are:

- (i) to promote the equitable geographical establishment, development and professional management of Global Geoparks,
- (ii) to advance knowledge and understanding of the nature, function and role of Global Geoparks;
- (iii) to assist local communities to value their natural and cultural heritage;

- (iv) to preserve Earth heritage for present and future generations;
- (v) to educate and teach the broad public about issues in geo-sciences and their relation with environmental matters and natural hazards.
- (vi) to ensure sustainable socio-economic and cultural development on the natural (or geological) system
- (vii) to foster multi-cultural links between heritage and conservation and the maintenance of geological and cultural diversity, using participatory schemes of partnership and management;
- (viii) to stimulate research when appropriate;
- (ix) to promote joint initiatives between Global Geoparks (e.g. communication, publications, exchange of information, twinning).

The GGN establishes ethical standards which must be adopted and respected by Global Geoparks and Global Geopark professionals.

The GGN organises co-operation and mutual assistance between Global Geoparks and between Global Geopark professionals.

The GGN initiates and co-ordinates Regional Geoparks Networks which will foster international co-operation and promotion of sustainable development.

The GGN represents, advances, and disseminates knowledge in Geodiversity management and other disciplines related to studies in Geo-conservation, Geo-tourism, Geo-education and/or the management and activities of Global Geoparks.
